I'm Edmark R. Gariando, 21 years old and currently studying at Polytechnic University of the Philippines **(PUP)** and a 3rd year student. My hobby is playing guitar especially more on bass guitar and playing mobile games.

I think Cybersecurity is focusing more on protection of the application software that the company will use in the future. My expectation for this subject is I will learn it really hard xd but, I think the instructor will help us to know more about cybersecurity. My preferred schedule is letter A.

I chose IT in PUP because they said that this subject has no math T.T and it is one of the most paying jobs worldwide that's why I chose this course. I chose PUP because it is one of the top and well-known university in the country.
